

Oil & Gas Law / Federal Oil and Gas Leasing

Westin Hotel, Westminster, Colorado

The Rocky Mountain Mineral Law Foundation is offering two concurrent one-week Oil and Gas Short Courses in Westminster, Colorado, with the Oil and Gas Law Short course co-sponsored by the Institute for Energy Law and the Energy & Mineral Law Foundation. These recurring programs, and the extensive materials utilized, are continually reviewed and updated by a group of practicing attorneys, landmen, and experienced law school professors to reflect the most recent developments in oil and gas law, leasing, regulation, and practice. These courses are designed for attorneys, landmen, paralegals, government employees, and others who are relatively inexperienced in the legal and/or land problems of the oil and gas industry, while more experienced individuals have found these courses to be of great benefit as a comprehensive review and update.

Oil and Gas Law **October 21-25, 2019** **(offered annually)**

The Oil and Gas Law Short Course presents the fundamentals of oil and gas leasing, contracting, conveyancing, and regulation, primarily on privately owned land. The main focus of this course is common law and state conservation laws that regulate oil and gas operations. The faculty consists of leading law professors and oil and gas practitioners, this year led by Jacqueline L. Weaver, Professor Emerita at the University of Houston Law Center.

Presentations will cover: geology; exploration and production operations; the rule of capture; ownership and correlative rights; common property interests created in oil and gas transactions; the nature of the oil and gas lease and its duration; implied covenants; royalties; division orders and check stub statutes; pooling and unitization; split estates; conservation regulation; local regulation by municipalities; environmental regulation; marketing agreements; farmouts; joint operating agreements; drilling contracts; mineral deeds; and taxation. Ethical issues in oil and gas practice are also presented through case examples.

For planning purposes, the co-sponsors plan to alternate this course between Colorado and Texas, with the 2020 course to be offered in Houston.

Federal Oil and Gas Leasing **October 21-24, 2019** **(next offered in 2021)**

Because of the tremendous extent of federal land ownership in the western U.S., oil and gas exploration and production activities on public lands will necessarily play an integral part in satisfying the demand for increased domestic energy supplies from the standpoint of both consumption and national security. The need to conduct these activities in an environmentally sound manner, coupled with ever-increasing competing uses of the public domain, dictate that companies and individuals that seek to conduct oil and gas operations involving federal lands be properly equipped to navigate the federal leasing system.

This year’s faculty is comprised of experienced and well-known practitioners, together with top government officials, led by Gregory J. Nibert, a partner with Hinkle Shanor LLP in Roswell. Lectures and exercises will provide attendees with basic understanding of the federal oil and gas leasing system, regularly encountered issues involving federal oil and gas leases, and practical “nuts and bolts” solutions to avoiding or resolving those issues.

If you registered for the RMMLF webinar in September on “Fundamentals of Federal Oil & Gas Leases,” contact info@rmmlf.org to have the full amount of that registration fee applied to the Federal Leasing Short Course!
